The screenshot shows a Google Meet window. The main display area shows a presentation slide titled "String Formatting Operator: %". The slide content is as follows:

**String Formatting Operator: %**

The operator % allows strings to be built out of many data items in a "fill in the blanks" fashion.

```
x = "Ram"
y = 34
print("%s's age is %d" % (x, y))
```

O/p  
Ram's age is 34

The tuple following the % operator is used to fill in the blanks in the original string marked with %s %g %d to represent string, float and integer values

Below the presentation, there is a video call interface with a toolbar showing icons for mute, video, chat, and other controls. The name "Badhusha Mohideen is presenting" is visible. On the right side, there is a chat window titled "Day-1 Workshop on 'Application...". The chat shows several messages from participants, including "yes sir..", "no doubts sir", and a link to a GitHub repository: <https://github.com/badhusha-sm/5-days-Online-Workshop-on-Applications-of-Python-programming-in-DA-and-ML>. The chat also shows a question from Jayashree Hegde K: "where to submit the assignments? in my github repository. ?".
